***Claim Rejections - 35 USC § 112***

1. Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 8 is a functional claim without any structural limitation. Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-2,4-6 are finally rejected under 35 U.S.C. 102(b) as being anticipated by Teicher et al. (US 5,451,213). Teicher et al. discloses a device comprising a needle encapsulating portion, a syringe barrel encapsulating portion and a retention portion. The retention means is 13,20 as shown in Figures 4-6.

Applicant's comments regarding Teicher et al. are noted. However, the comments are directed to a combination of the syringe with the disposal device which has not been claimed in the instant invention. The claims are only directed to a disposal device and Teicher et al. provides a device that fulfills the structural limitation of the claim suitable for a syringe of smaller size.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 7-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Teicher in view of Mueller (US 4,954,239). Teicher does not disclose a kit for holding the device and accessories. But Mueller teaches a kit, for example, a container 14 with other accessories therein in combination with a syringe. It would have been obvious in view of Mueller to store the syringe in a container.

***Allowable Subject Matter***

6. Claims 9-10 are allowed.
7. Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

Art Unit: 3728

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
